

GENERATEPATH (VBSCRIPT FUNCTION TO CREATE FOLDERS RECURSIVELY)

This function will generate / create a single folder (if the parent path already exist) or a complete path+folder if the absolute path doesn't already exist.

```
Function GeneratePath(pFolderPath)

GeneratePath = False

If Not objFSO.FolderExists(pFolderPath) Then

If GeneratePath(objFSO.GetParentFolderName(pFolderPath)) Then

GeneratePath = True

Call objFSO.CreateFolder(pFolderPath)

End If

Else

GeneratePath = True

End If

End Function
```

EXAMPLE

This example will create a complete path if **test1....test8** will not exist....

```
GeneratePath("C:\test1\test2\test3\test4\test5\test6\test7\test8\test9")
```
