## INTERNET EXPLORER 7/8/9 – HOW TO DISABLE RUNONCE PAGE

---

### **SCENARIO**

*When I try to open IE 7 it searches for a while at:*

*<http://go.microsoft.com/fwlink/?LinkId=74005>*

*and then fails. I run the test and the connection shows fine.*

### **SOLUTION**

Copy the below code in a file having extension as .reg (eg **IE7.reg**) and save it on desktop. Double click it to update the registry.

```
Windows Registry Editor Version 5.00
[HKEY_CURRENT_USER\Software\Microsoft\Internet Explorer\Main]
"RunOnceComplete"=dword:00000001
"RunOnceHasShown"=dword:00000001
```
