REMOVE THE UNDERLINES FROM LINKS OR ANCHOR TAG

Use **Cascading Style Sheets (CSS)** to turn off the underlines on links.

Difficulty: Easy
Time Required: 2 minutes

HERE'S HOW

Write your link:

```
<a href=""
```

Add the style tag:

```
style="
```

Set the text-decoration to none:

```
text-decoration : none;
```

Close the style tag and the anchor:

```
">
```

Write the link text and close the link:

```
</a>
```

Your final link should look like this:

```
<a href="" style="text-decoration:none;">this link has no underline</a>
```

TIPS

Remember that anchors that are not underlined are hard for people to use. They don't always realize that the text is a link, even if their mouse changes or the color changes.

WHAT YOU NEED

HTML Editor or text editor (Notepad, EditPad, Wordpad, vim, etc.).
