

SET WINDOWS EXPLORER'S DEFAULT STARTUP FOLDER (WINDOWS)

By default, **Windows Explorer** always opens with **My Documents**. You can customize it by changing the properties for the **Windows Explorer** icon and replace the **Target** field with: `%SystemRoot%\explorer.exe /e, c:\yourfolder`

- Right click on the icon you use to launch **Explorer** and select **Properties**.
- In the **Target** box, type (or replace the existing text with) the following:

```
%SystemRoot%\Explorer.exe /e, path
```

Where in place of path above you should enter the actual path to the directory you want open by default.

For example **C:\Windows**, or **C:\Documents and Settings**, etc.

To have **My Computer** listed as the default selection, type `explorer.exe /e,`
