VISUAL BASIC 6 – HOW TO DISABLE ALL CONTROLS IN A FORM?

SCENARIO

How to disable some control in form?
For example, disable all command button and all textbox in a form???

SOLUTION (1st Method)

```
Dim ctrl As Control
For Each ctrl In Me.Controls
If TypeOf ctrl Is CommandButton Then
ctrl.Enabled = False
End If
Next
```

Function Version (by Heelpbook Staff)

```
Public Function disena(switch As Integer)
If switch = 1 Then
enable = True
Else
enable = False
End If
Dim ctrl As Control
For Each ctrl In Me.Controls
If TypeOf ctrl Is CommandButton Then
ctrl.Enabled = enable
End If
Next
End Function
```

SOLUTION (2nd Method)

To disable all of them you can simply disable entire form - until your main logic is done user won't be able to close the form:

```
Private Sub Command1_Click()
'disable form
Me.Enabled = False
'do your main stuff here
'reset the form
Me.Enabled = True
End Sub
```
