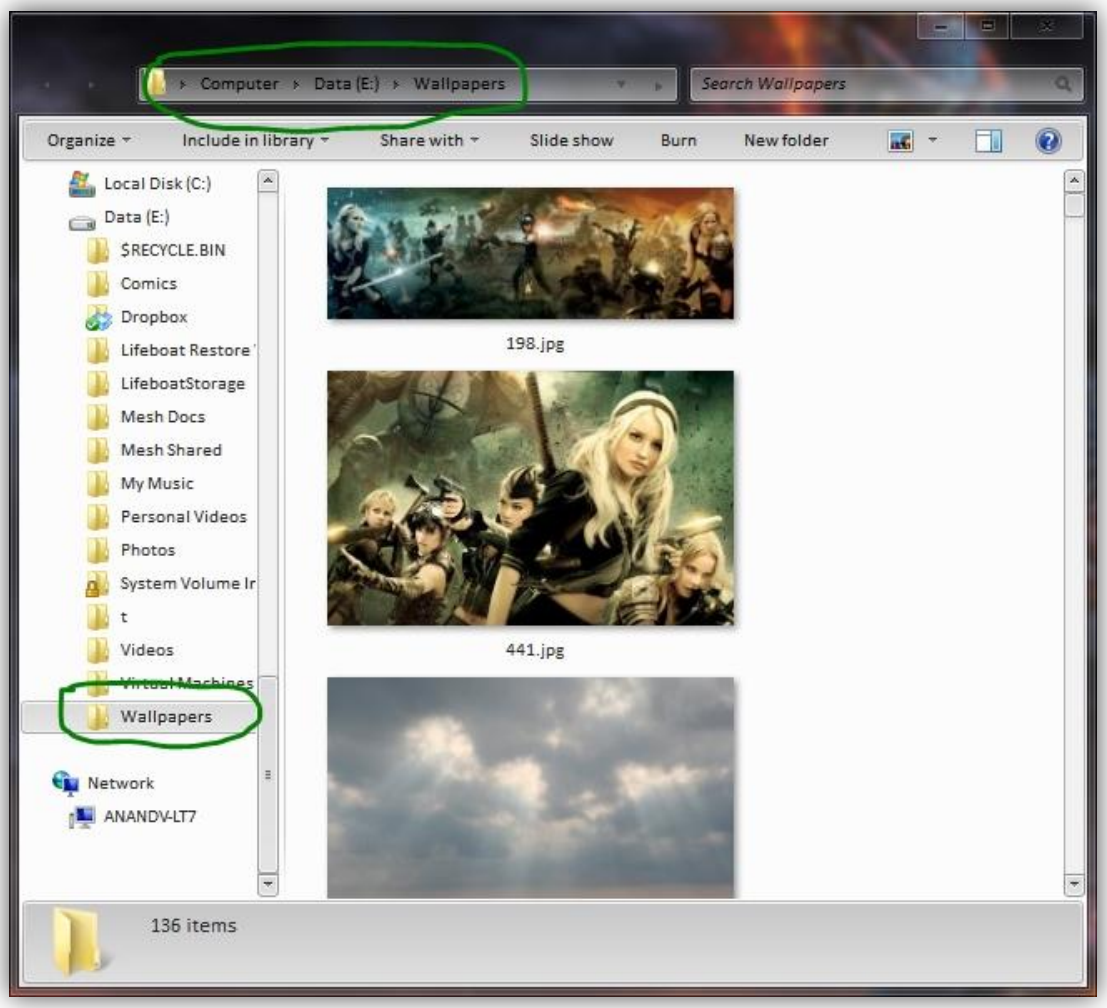
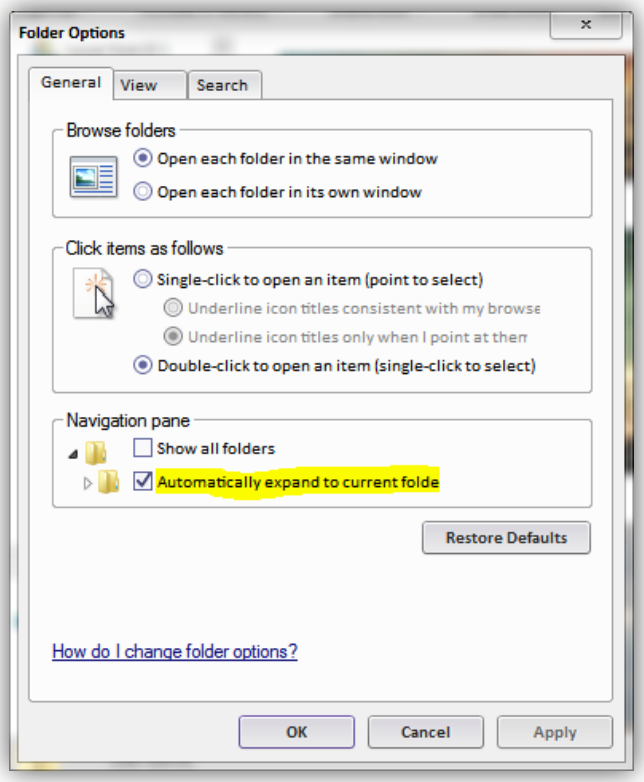
WINDOWS 7 – AUTOMATICALLY EXPAND NAVIGATION TREE TO THE CURRENT FOLDER

Once I learned this option exists, it is a breeze to use **Explorer** on multi-level sub trees. It's better then changing sub folder levels in address bar. Once you enable this setting, this is you see it.



If you are interested, follow the steps to enable it.

- On you **Explorer** window, click **Organize** and select **Folder and Search** options
- Check the box for the Navigation pane option **Automatically expand to current folder**
- Click **OK** to close.



Folder Options
General
View
Search
Browse folders
Open each folder in the same window
Open each folder in its own window
Click items as follows
Single-click to open an item (point to select)
